

ABSTRACT

The present invention relates to imidazopyridine derivatives of the Formula I and, therapeutically acceptable salts thereof, which inhibit exogenously or endogenously stimulated gastric acid secretion and thus can be used in the treatment of gastrointestinal inflammatory diseases. In further aspects, the invention relates to the compound of the invention for use in therapy; to processes for preparation of such new compound; to pharmaceutical compositions containing the compound of the invention, or a therapeutically acceptable salt thereof, as active ingredient; and to the use of the compound of the invention in the manufacture of medicaments for the medical use indicated above.
